### Server Hardware Requirements

- 125 MB of RAM
- 25 MB of hard disk space (for application)

### Desktop Hardware Requirements

- 125 MB of RAM
- 25 MB of hard disk space (for the application)

## Installing Toolkit

The installation process copies the Toolkit files to the appropriate location on your system.

### To install Toolkit:

1. Log onto the system where you plan to install Toolkit. You may need to use either a Local Administrator account or a domain account with Local Administrator rights.
2. Download the latest ActivePDF Toolkit installer from <http://www.activepdf.com/myaccount/downloads>.
3. When prompted to save the file, navigate to your desktop and click **OK**.  
The file is saved.
4. Double-click **APTToolkit\_2011.exe** on the desktop.

The Welcome screen appears.

5. Click **Next**.

The License Agreement appears.

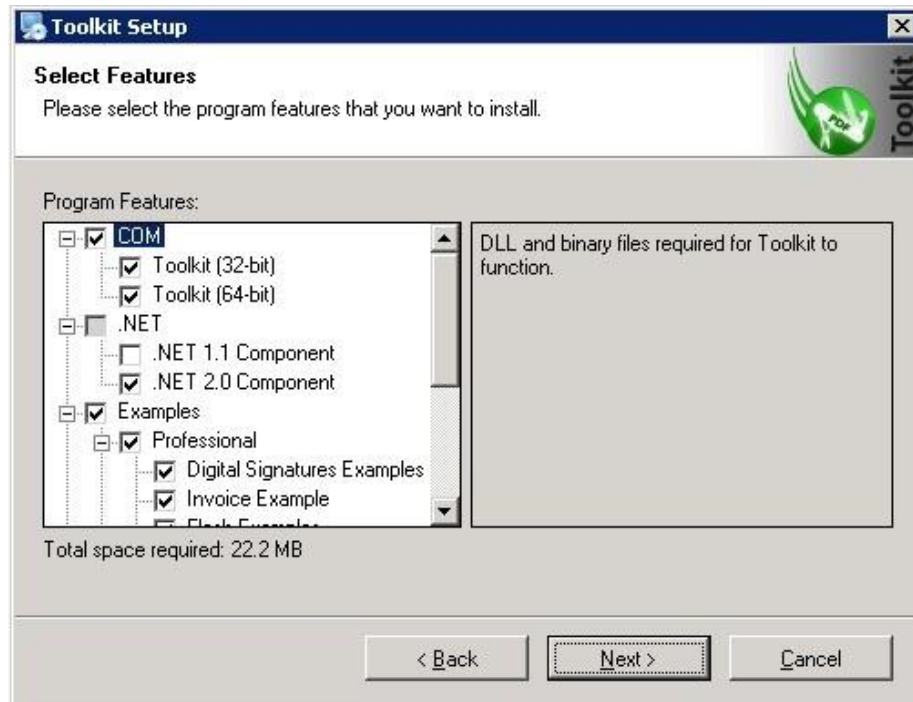

6. Read the License Agreement.

7. If you have read and understand the agreement, select **I agree to the terms of this license agreement**.

**NOTE:** You should not proceed with the installation if you do not understand, or do not agree with the License Agreement.

8. Click **Next**, and then continue to follow the on screen prompts.

The Select Features screen appears.

9. Select the Toolkit program features to install:
  - **COM**—Installs the Toolkit COM DLLs and binary files. Select one or both of the following:
    - **Toolkit (32-bit)**—Installs the 32-bit version of the Toolkit COM object.
    - **Toolkit (64-bit)**—Installs the 64-bit version of the Toolkit COM object.
  - **.NET**—Installs the .NET assemblies for Toolkit. Select one or both of the following:
    - **.NET 1.1 Component**—Installs the .NET 1.1 assembly for Toolkit.
    - **.NET 2.0 Component**—Installs the .NET 2.0 assembly for Toolkit.
  - **Examples**—Installs example code and files that demonstrate Toolkit’s functionality. Select one or both of the following:
    - **Professional**—Installs examples of features available only in Toolkit Pro. Select one or more of the following:
      - **Digital Signatures Example**—Demonstrates Toolkit’s ability to create certificates and utilize digital signatures.
      - **Invoice Example**—Creates a sample invoice including Flash™ and Barcode capabilities.
      - **Flash Examples**—Demonstrate Toolkit’s support for Flash™ files.
    - **Standard**—Installs examples of features available in both Toolkit Standard and Professional versions. Select one or more of the following:
      - **Barcode Examples**—Demonstrate Toolkit’s ability to add barcodes to PDF files.
      - **Form Field Examples**—Demonstrate Toolkit’s support for the creation and modification of form fields in PDF files.
      - **Help Files**—Installs the online help documentation for Toolkit. Select one or both of the following:
        - **Toolkit API Documentation**—Provides technical reference for the methods and properties in Toolkit COM and .NET objects.
        - **Help Collection for Visual Studio**—Makes the Toolkit API documentation accessible directly from Visual Studio.
  - **Certificate Manager**—Installs a shortcut to Certificate Manager for viewing the statuses of certificates on the local machine. (Certificates are available only with Toolkit Pro.)
10. When the Ready to Install screen appears, click **Next**.
11. When the Installation Successful screen appears, click **Finish**.  
Toolkit is installed and ready for use.
